

# riset\_notebook

April 5, 2023

## 1 riset Examples

This notebook demonstrates the [J riset script](#). `riset` computes the rise, transit, and set times of named [IAU Stars](#).

To run this notebook you must install a J jupyter kernel. See Martin Saurer's [GitHub repository](#) for instructions.

```
[1]: NB. J version and date
smoutput 9!:14 ''
smoutput 6!:0 ''

NB. set portable box drawing characters
portchars=:[: 9!:7 '+++++++|-'"_ [ ]

15-0-7/SLEEF=1
2023 4 5 12 23 0.237
```

### 1.1 Installation

`riset` is distributed as a J addon. It is installed in the J `~addons/jacks` folder. It can be installed from [GitHub](#) with:

```
[2]: load 'pacman'
NB. smoutput install 'github:bakerjd99/jackshacks' NB. uncomment to install
```

The `jacks` (J-hacks) addons are self contained [JOD generated](#) J scripts. Each `ijs` script is accompanied with pdf document that describes how to use it. Some scripts, like `riset` are also packaged with a Jupyter notebook (this file) and a pdf version of the notebook. For example, the `riset` files are:

```
riset.ijs
riset.pdf
riset_notebook.ipynb
riset_notebook.pdf
```

There are other scripts in `~addons/jacks` and more will be added from time to time. To refresh the folder, reissue the install command.

In addition to these files the subfolder `~addons/jacks/testdata` contains data files. `riserset` files in `testdata` are:

```
Bright_Stars_Meridian_Almanac_23mar27.md
iau_named_stars_2022.txt
Navigation_Stars.txt
```

```
[3]: NB. addon files
dir '~addons/jacks'
```

```
testdata          <dir>      28-Mar-23 22:45:21

Additional stars/objects can be added by editing the IAU file or by doing the following.

New objects need a name, right ascension (RA), and declination (Dec) for the J2000.0 epoch.

```

### 1.3 Maintaining and modifying risese

All **risese** code, documentation and test scripts are stored in the JOD dictionary **futs**. To change the code or run the test cases you need to install the JOD dictionaries **futs** and **utils**.

Use J's package manager to install the JOD addons **general/jod**, **general/joddocument**. If you have installed all the addons JOD is already on your system.

After installing JOD do:

1. Download the JOD dump scripts:

<https://github.com/bakerjd99/joddumps/blob/master/utils.ijs>

<https://github.com/bakerjd99/joddumps/blob/master/futs.ijs>

and put them in a **~temp** folder.

2. Start JOD and check for the presence of **futs** and **utils**.

```
NB. start JOD
load 'general/jod'
(;:'futs utils') e. od''
```

3. Only if both dictionaries are missing do:

```
newd 'utils'  NB. creates utils dictionary in '~user/joddicts/utils'
newd 'futs'   NB. creates futs in '~user/joddicts/futs'
```

4. Load the dictionaries:

```
NB. load utils first
od 'utils' [ 3 od ''
0!:0 <jpath '~temp/utils.ijs'
NB. rebuild references
0 globs&> }. revo ''
NB. take first binary backup
packd 'utils'

NB. load futs with utils on path
od ;:'futs utils' [ 3 od ''
0!:0 <jpath '~temp/futs.ijs'
NB. rebuild references
0 globs&> }. revo ''
NB. take first binary backup
packd 'futs'

NB. close dictionaries
3 od ''
```

The rest of this notebook *assumes* you have installed **futs** and **utils**.

It also assumes a basic knowledge of JOD. See the JOD Manual for details. The JOD Manual is distributed in the **general/joddocument** addon - see:

~addons/general/joddocument/pdfdoc/jod.pdf

jod.pdf is also available on [The JOD Page](#)

## 1.4 riseset test suite

Many **riseset** test cases are in **futs**. Groups of test cases are called suites. The contents of the **riseset** suite is:

```
[11]: NB. open futs and utils - assumed open until notebook end
load 'general/jod'
od ;:'futs utils' [ 3 od ''
```

```
++-----+-----+
|1|opened (rw/ro) ->|futs|utils|
++-----+-----+
```

```
[12]: NB. list test cases in (riseset) suite
smoutput ,. }. 3 grp 'riseset'

NB. changes: -----

```
coclass tmploc_AAAbuild999_=: 'AAAbuild999' [ coerase <'AAAbuild999'  
coinset 'ijod'
```

```
scrn=: 'riseset'
```

```
>0{OPENDIC=: did 0
```

NB. if (imex) is first dictionary on path include it

```
headdic=: ('imex'-:>1{OPENDIC) #'imex '
```

```
>0{od ;: headdic,'futs utils' [ 3 od ''
```

```
>0{tmploc get ;:'gettxt getmd read write showpass sha256 afterstr beforestr
```

```
+-----+-----+-----+
```

```
|1|closed ->|futs|utils|
```

```
+-----+-----+-----+
```

1.6 All done - thanks for playing
